

ColumnCheckBoxAlignment

The alignment of the column's check boxes.

Usage

```
Set_Property(OLECtrlEntID, "OLE.ColumnCheckBoxAlignment[col]", OptionValue)
```

Values

OptionValue can be set to one of the following valid options:

Value	Abbr.	Description
Left	L	Aligns check box to the left
Center	C	Aligns check box in the center
Right	R	Aligns check box to the right

Default: Left

Indices

Index	Description
col	The index to a column in the report table

Remarks

The ColumnCheckBoxAlignment property determines the alignment of the checkbox within the column's items. **Left** places the check box on the left side of the item with the text to the right. **Right** places the check box on the right side of the item with the text to the left. **Center** centers the the check box within the item and ignores text placement. Therefore, making both this property and the [ColumnAlignment](#) property **Center** will cause the text to overlay the check box.

Example

```
// Right align the third column's check box
Set_Property(@Window:".OLE_REPORTTABLE", "OLE.ColumnCheckBoxAlignment[3]", "Right")
```
