

ColumnFooterFont

The column footer's font.

Usage

```
Set_Property(OLECtrlEntID, "OLE.ColumnFooterFont[col]", FontArray)
```

Values

The *FontArray* structure uses the same formatting as the OpenInsight FONT property. Visit the [Font](#) common OLE property page for further documentation.

Default: Tahoma, 8 pt.

Indices

| Index | Description |
|-------|---|
| col | The index to a column in the report table |

Remarks

The ColumnFooterFont sets the font used to render the footer's text.

Example

```
// Make the footer for column 2 bold
Set_Property(@Window:".OLE_REPORTTABLE", "OLE.ColumnFooterFont[2]", @SVM:@SVM:700)
```
