

ColumnFooterTextFormatted

The column footer's text, formatted using the its format settings.

Usage

```
Set_Property(OLECtrlEntID, "OLE.ColumnFooterTextFormatted[col]", Text)
```

Values

Text can contain anything.

Default: ""

Indices

Index	Description
col	The index to a column in the report table

Remarks

The ColumnFooterTextFormatted property is the read only version of the [ColumnFooterText](#) property that formats the data according the column footer's format setting.

Example

```
// Get the formatted text for column 5's footer
FormattedText = Get_Property(@Window:".OLE_REPORTTABLE", "OLE.ColumnFooterTextFooter[5]")
```
