

# ColumnImage

The column header's image.

## Usage

```
Set_Property(OLECtrlEntID, "OLE.ColumnImage[col]", Value)
```

## Values

*Value* can be any positive or negative whole number:

**Default:** 0

## Indices

Index	Description
col	The index to a column in the report table

## Remarks

The ColumnImage property determines the image to appear in the column's header, next to the column header text. The property must be set to a valid index into the image that was set in the [ImageList](#) property.

## Example

```
// Load the table's image list and set column 1 to the 3rd image
ImageList<1> = "c:\reportimages.bmp":@VM:4:@VM:"Auto"
Set_Property(@Window:".OLE_REPORTTABLE", "OLE.ImageList", ImageList)
Set_Property(@Window:".OLE_REPORTTABLE", "OLE.ColumnImage[1]", 3)
```
