

FooterVisible

Shows or hides the column footers.

Usage

```
Set_Property(OLECtrlEntID, "OLE.FooterVisible", Boolean)
```

Values

[True | False]

Default: False

Remarks

The FooterVisible property determines whether or not a footer appears at the bottom of the table. By default, this is false. Set this to true to display the footer and customize its appearance using the various ColumnFooter properties.

Example

```
// Show the column footers
Set_Property(@Window:".OLE_REPORTTABLE", "OLE.FooterVisible", 1)
```
