

# GroupRowContextMenuEnabled

Determines if right clicking on a group row fires an event or displays a standard context menu.

## Usage

```
Set_Property(OLECtrlEntID, "OLE.GroupRowContextMenuEnabled", Boolean)
```

## Values

*[True | False]*

**Default:** True

## Remarks

The GroupRowContextMenuEnabled property establishes what happens when the user right clicks on a group row. By default, it displays a popup menu for expanding or collapsing the group. If you'd rather get an [OnItemClick](#), then set this property to 0.

## Example

```
// Give me an OnItemClick on right clicks
Set_Property(@Window:".OLE_REPORTTABLE", "OLE.GroupRowContextMenuEnabled", 0)

// Give me the built-in context menu on right clicks
Set_Property(@Window:".OLE_REPORTTABLE", "OLE.GroupRowContextMenuEnabled", 1)
```
