

# ItemImage

Sets the image to appear next to the item's text.

## Usage

```
Set_Property(OLECtrlEntID, "OLE.ItemImage[col; record]", Integer)
```

## Values

*Integer*

**Default:** 0

## Indices

Index	Description
col	The index to a column in the report table
record	The index to a record in the report table

## Remarks

The ItemImage property sets the image to appear next to the item's text. First, you have to set up an image list using the [ImageList](#) property. Then you set this property to the index of the image you want to display. The image will appear to the left of the text.

***Just like the SRP EditTable Control, you must separate the column and record index by a semicolon, not a comma.***

## Example

```
// Set the first item in the third record's image to the fifth image in our image list
Set_Property(@Window:".OLE_REPORTTABLE", "OLE.ItemImage[1;3]", 5)
```
