RowCount

The number of rows in the table.

Usage

```
Value = Get_Property(OLECtrlEntID, "OLE.RowCount")
```

Values

Value can be any positive or negative whole number:

Remarks

The RowCount property returns the number of rows in the table. Note that group rows are not included in the count. This is a read only property, so you cannot change the number of rows by setting this property to a new value.

Example

```
// Get the current number of rows in the table
NumRows = Get_Property(@Window:".OLE_REPORTTABLE", "OLE.RowCount")
```
