

# TopRow

The row that is scrolled to the top of the viewable area.

## Usage

```
Set_Property(OLECtrlEntID, "OLE.TopRow", Value)
```

## Values

*Value* can be any positive or negative whole number:

**Default:** 1

## Remarks

The TopRow property is the index to the row that is currently the first visible row. To programmatically scroll the Report Table, set this property to the desired row.

## Example

```
// Scroll to 10 row  
Set_Property(@Window:".OLE_REPORTTABLE", "OLE.TopRow", 10)
```
