

TopRow

The row that is scrolled to the top of the viewable area.

Usage

```
Set_Property(OLECtrlEntID, "OLE.TopRow", Value)
```

Values

Value can be any positive or negative whole number:

Default: 1

Remarks

The TopRow property is the index to the row that is currently the first visible row. To programmatically scroll the Report Table, set this property to the desired row.

Example

```
// Scroll to 10 row  
Set_Property(@Window:".OLE_REPORTTABLE", "OLE.TopRow", 10)
```
