

SetTableAlias

Description

Attempts to create an alias for the indicated table, volume, and database. It returns a True\$ if successful or a False\$ if unsuccessful.

Syntax

```
rv = Database_Services("SetTableAlias", TableName, AliasName, Volume, DatabaseID)
```

Parameters

Parameter	Description
<i>TableName</i>	[REQUIRED] The linear hash database table name.
<i>AliasName</i>	[REQUIRED] The alias name being set.
<i>Volume</i>	[REQUIRED] The location path or volume name where the table exists.
<i>DatabaseID</i>	[Optional] Database ID of the table being aliased. Defaults to the current Database ID (@DBID).

Version

16.0.19
