<Button>	A button control associated with a command.	Zero or more	1.0	3.2
<Page>	A page in the Backstage.	One or more	1.0	3.2

Attributes

No attributes.

Remarks

The Backstage element defines the popup that appears when the user clicks the system button. This popup fills the entire area of the form. The left side of the backstage contains the buttons you've created while the right side contains pages. Buttons, when clicked, simply close the backstage and fire the [OnCommand](#) event. Pages, when clicked, display a page you've create. See the [<Page>](#) element for details on how to create a page.

Note: You have to have at least one page so that the right portion of the backstage is filled in.

Example

```
<Backstage>
  <Button Command="SAVE" />
  <Button>
    <Command Key="SAVE_AS" Caption="Save As" KeyboardTip="A" SmallIcon="Images\16x16\save.png" Tooltip="Saves
the document to the selected file." />
  </Button>
  <Button>
    <Command Key="OPEN" Caption="Open" KeyboardTip="O" SmallIcon="Images\16x16\folder_open.png" Tooltip="Opens
a new document." />
  </Button>
  <Page Key="INFO">
    <Command Key="INFO" Caption="Info" KeyboardTip="I" SmallIcon="Images\16x16\info.png" Tooltip="The
document's metadata." />
  </Page>
  <Button>
    <Command Key="PRINT" Caption="Print" KeyboardTip="P" SmallIcon="Images\16x16\print.png" Tooltip="Prints the
document." />
  </Button>
  <Button>
    <Command Key="SHARE" Caption="Share" Tooltip="Shares the document with other users." />
  </Button>
  <Button>
    <Command Key="EXPORT" Caption="Export" Tooltip="Exports the document to other formats." />
  </Button>
