Indices

Index	Description
ID	Unique ID of an existing appointment

Remarks

The Appt property is an appointment. You can use it to get the current information on an appointment or to update an appointment. The data is an @FM delimited list. See AppointmentList for more details.

Example

```
// Move the appointment to another entity
Set_Property(@Window:".OLE_SCHEDULE", "OLE.Appt[":ApptID:"]", NewEntity)

// Update an appointment's color
Set_Property(@Window:".OLE_SCHEDULE", "OLE.Appt[":ApptID:"]", @FM:@FM:@FM:RGB(255, 0, 0))

// Get an appointment
Appt = Get_Property(@Window:".OLE_SCHEDULE", "OLE.Appt[":ApptID:"]")
```
