

OnApptDbClick

Fired when the user double clicks an appointment.

Parameters

Parameter	Description
ApptID	ID of the appointment
Button	The button used to double click
Shift	Flag indicating whether or not the Shift key is pressed
Ctrl	Flag indicating whether or not the Control key is pressed

Remarks

The OnApptDbClick event fires when the user double clicks an appointment. The ApptID parameter provides the unique ID of the appointment involved and can be used directly with any properties requiring an appointment ID. The Button parameter provides the name of the button used to perform the double click while the Shift and Ctrl parameters provide the states of the Shift and Control keys respectfully.

Example

```
Transfer Param1 to ApptID
Transfer Param2 to Button
Transfer Param3 to Shift
Transfer Param4 to Ctrl

// Lock the appointment
Set_Property(@Window:".OLE_SCHEDULE", "OLE.ApptLocked[:ApptID:]", Yes$)

// Open the appointment form passing the ID to the CreateParam
Start_Window("DBW_APPT", "", ApptID)
```
