

# AllowXPTheme

Establishes whether or not the status bar should be drawn using the current XP Visual Style.

## Usage

```
Set_Property(OLECtrlEntID, "OLE.AllowXPTheme", Boolean)
```

## Values

*[True | False]*

**Default:** False

## Remarks

The AllowXPTheme property allows you to enhance your application by supporting Windows XP's Visual Style technology. When this property is set to TRUE, then Windows XP users will see the status bar control in their current theme. On all other Windows operation systems, the control appears normally regardless of the value of this property.
