

PaneFont

The font used to display a pane's caption.

Usage

```
Set_Property(OLECtrlEntID, "OLE.PaneFont[index]", FontArray)
```

Values

The *FontArray* structure uses the same formatting as the OpenInsight FONT property. Visit the [Font](#) common OLE property page for further documentation.

Default: Tahoma, 8 pt.

Indices

| Index | Description |
|-------|---------------------------|
| index | Index to an existing pane |

Remarks

The PaneFont property allows you to change the font of panes individually. Refer to the [Font OLE property type](#) for information on how to format the *FontArray*.
