ComboDropDown

Shows or hides control's combo box drop down.

Usage

```
Set_Property(OLECtrlEntID, "OLE.ComboDropDown[CtrlId]", Boolean)
```

Values

[True | False]

Default: False

Indices

Index	Description
CtrlId	Identifies a subclassed control

Remarks

Applies To: EDITLINE, EDITBOX

The ComboDropDown property allows programmatic control over the visibility of a control's combo box drop down. Simply pass 1 to this property to show the dropdown or 0 to hide it.

Example

```
// NOTE: using ; and not .
CtrlId = @Window:";EDITLINE"

// Show the combo box drop down
Set_Property(@Window:".OLE_SUBCLASS", "OLE.ComboDropDown[":CtrlId:"]", 1)

// Determine if the combo box is visible or not
IsComboVisible = Get_Property(@Window:".OLE_SUBCLASS", "OLE.ComboDropDown[":CtrlId:"]")
```
