

OptionImage

The option button's image.

Usage

```
Set_Property(OLECtrlEntID, "OLE.OptionImage[CtrlId]", Array)
```

Values

Array has the following structure:

Pos	Name	Type	Description	Default
<1>	Image Path	Formatted String	The full path and file name of the image	""
<2>	Transparent Color	Formatted String	The color within the bitmap not to be drawn. Use "Auto" to designate the top-left most pixel color	Auto

Indices

Index	Description
CtrlId	Identifies a subclassed control

Remarks

Applies To: EDITLINE, EDITBOX

The OptionImage property replaces the default drop down arrow image to a custom one in an existing EDITLINE option button. Note that the look and feel of the button will change slightly when running Windows XP Themes in order to accomodate the new image.

For details regarding supported image types and how you can load images, see the [Image](#) type documentation.

Example

```
// Subclass my editline control and add an option button with a custom image
CtrlId = @Window:".EDITLINE"
Handle = Get_Property(CtrlId, "HANDLE")
rv = Send_Message(@Window:".OLE_SUBCLASS", "OLE.Subclass", Handle, CtrlId)
Convert "." to ";" in CtrlId
Set_Property(@Window:".OLE_SUBCLASS", "OLE.OptionButton[":CtrlId:"]", 1)
Set_Property(@Window:".OLE_SUBCLASS", "OLE.OptionImage[":CtrlId:"]", "C:\MyOptionImage.png")
```
