

OptionOnFocus

Indicates whether or not the option button disappears when the control loses focus.

Usage

```
Set_Property(OLECtrlEntID, "OLE.OptionOnFocus[CtrlId]", Boolean)
```

Values

[True | False]

Default: False

Indices

Index	Description
CtrlId	Identifies a subclassed control

Remarks

Applies To: EDITLINE, EDITBOX

The OptionOnFocus property is a flag determining whether the option button is visible or not when the control does not have focus. Set this to 1 to have the option button appear only when the control has focus. Set this to 0 (which is the default) to have the option button appear at all times.

Example

```
// Subclass my editline control and add an option button that appears only during focus
CtrlId = @Window:".EDITLINE"
Handle = Get_Property(CtrlId, "HANDLE")
rv = Send_Message(@Window:".OLE_SUBCLASS", "OLE.Subclass", Handle, CtrlId)
Convert "." to ";" in CtrlId
Set_Property(@Window:".OLE_SUBCLASS", "OLE.OptionButton[":CtrlId:"]", 1)
Set_Property(@Window:".OLE_SUBCLASS", "OLE.OptionFocus[":CtrlId:"]", 1)
```
