

DefCheckBox

Default check box setting for new items.

Usage

```
Set_Property(OLECtrlEntID, "OLE.DefCheckBox", OptionValue)
```

Values

OptionValue can be set to one of the following valid options:

Value	Abbr.	Description
None	N	No check box
Left	L	Show a check box on the left side of the new item
Right	R	Show a check box on the right side of the new item

Default: None

Remarks

The DefCheckBox property establishes the default check box setting for new items. Setting this property will not change existing items. Instead, newly added items will take on the setting established in this property. See the [ItemCheckBox](#) property for details.

The CheckBoxConditions property is a much easier way of setting check boxes.

For more information on how default properties can make you more efficient, see the [Default Properties](#) article.

Example

```
// Make right-side check boxes the default
Set_Property(@Window:".OLE_TREE", "OLE.DefCheckBox", "Right")
```
