

DefEnabled

Default enabled state for new items.

Usage

```
Set_Property(OLECtrlEntID, "OLE.DefEnabled", Boolean)
```

Values

[True | False]

Default: True

Remarks

The DefEnabled property establishes the default enabled state of new items. Setting this property will not change existing items. Instead, newly added items will take on the setting established in this property. See the [ItemEnabled](#) property for details.

For more information on how default properties can make you more efficient, see the [Default Properties](#) article.

Example

```
// Make all new items disabled by default  
Set_Property(@Window:".OLE_TREE", "OLE.DefEnabled", 0)
```
