

DefExpandable

Default expandable setting for new items.

Usage

```
Set_Property(OLECtrlEntID, "OLE.DefExpandable", Boolean)
```

Values

[True | False]

Default: True

Remarks

The DefExpandable property establishes the default expandable setting for new items. Setting this property will not change existing items. Instead, newly added items will take on the setting established in this property. See the [ItemExpandable](#) property for details.

For more information on how default properties can make you more efficient, see the [Default Properties](#) article.

Example

```
// Prevent the user from expanding any new items  
Set_Property(@Window:".OLE_TREE", "OLE.DefExpandable", 0)
```
