

DefFont

Default font for new items.

Usage

```
Set_Property(OLECtrlEntID, "OLE.DefFont", FontArray)
```

Values

The *FontArray* structure uses the same formatting as the OpenInsight FONT property. Visit the [Font](#) common OLE property page for further documentation.

Default: Tahoma, 8 pt.

Remarks

The DefFont property establishes the default font for new items. Setting this property will not change existing items. Instead, newly added items will take on the setting established in this property. See the [ItemFont](#) property for details.

For more information on how default properties can make you more efficient, see the [Default Properties](#) article.

Example

```
// Use the Arial font for all new items
Set_Property(@Window:".OLE_TREE", "OLE.DefFont", "Arial")
```
