

DefSelectable

Default selectable setting for new items.

Usage

```
Set_Property(OLECtrlEntID, "OLE.DefSelectable", Boolean)
```

Values

[True | False]

Default: True

Remarks

The DefSelectable property establishes the default selectability of new items. Setting this property will not change existing items. Instead, newly added items will take on the setting established in this property. See the [ItemSelectable](#) property for details.

For more information on how default properties can make you more efficient, see the [Default Properties](#) article.

Example

```
// Prevent the user from selecting new items  
Set_Property(@Window:".OLE_TREE", "OLE.DefSelectable", 0)
```
