

SRP_DateTime Year

A datetime's year.

```
Year = SRP_DateTime("Year", Datetime)
```

Returns

The year component of an OI datetime.

Parameters

Parameter	Description
Datetime	A datetime in OI internal format. (REQUIRED)

Remarks

The "Year" service returns the year component of an OI datetime. For example, if an OI datetime represents March 30, 1978 at 12:41:08pm, this service would return 1978. If the given datetime not valid, "" is returned.

Examples

```
// Get the current year
Year = SRP_DateTime("Year", DateTime())

// Get the current year in UTC
Year = SRP_DateTime("Year", SRP_DateTime("Today", 1))

// Get a hard coded datetime's year
Year = SRP_DateTime("Year", -9519.67241898148)

// Parse a datetime's year
Date = SRP_DateTime("Parse", "Thursday, March 30, 1978 at 12:41:08pm", "DDD, MMMM D, YYYY at h:mm:ssstt")
Year = SRP_DateTime("Year", Date)
```
