SRP_Date Validate

Determines if the given date is a real date.

```
IsValid = SRP_Date("Validate", Year, Month, Day)
```

Returns

1 if the components represent an actual calendar date, 0 if not.

Parameters

Parameter	Description
Year	A calendar year. **(REQUIRED)**
Month	A calendar month. **(REQUIRED)**
Day	A day for the given month. **(REQUIRED)**

Remarks

The "Validate" service determines if the the given components represent a valid calendar date. If even just one component is "out of bounds," then 0 is returned. Leap years is taken into account.

Examples

```
// Validate a date
IsValid = SRP_Date("Validate", 1941, 12, 8)
```
