

# SRP\_Date FirstDayOfWeek

The first day of the week for a given locale.

```
DayOfWeek = SRP_Date("FirstDayOfWeek", Locale = "")
```

## Returns

An integer between 1 and 7, 1 = Monday, 7 = Sunday.

## Parameters

Parameter	Description
Locale	A locale for culture specific names. (OPTIONAL)

## Remarks

The "FirstDayOfWeek" service retrieves a culture's first day of the week. The result will be an integer between 1 and 7, with 1 being Monday and 7 being Sunday. *Locale* is the [locale name](#) used to target a specific culture to determine what that culture's first day of the week is.

Here is a sample of possible return values based on different locales.

en-US	es-MX	es-ES	fr-CA	fr-FR
7	7	1	7	1

## Examples

```
// Get the first day of the week for the local culture
DayOfWeek = SRP_Date("FirstDayOfWeek")

// Get the first day of the week in Spain
DayOfWeek = SRP_Date("DayOfWeekName", "es-ES")
```
