

## 3.x - GetOECGIProcErr

Returns the original HTTP ProcErr that the OECGI creates.

### Syntax

```
Response = HTTP_Services('GetOECGIProcErr')
```

### Returns

The original HTTP ProcErr that the OECGI creates.

### Parameters

N/A

### Remarks

Used by the [3.x - CreateLogFile](#) service when creating the ProcErr log. It will also be used when creating the Request log and the *Request* argument is empty.
