

## 3.x - SetResponseStatus

Sets the HTTP status code to be used in the response.

### Syntax

```
Response = HTTP_Services('SetResponseStatus', Code, Phrase)
```

### Returns

N/A

### Parameters

Parameter	Description
Code	HTTP status code to set. <b>Required.</b>
Phrase	Custom phrase to send with the status code. <b>Optional.</b>

### Remarks

This can be set at any time. If unchanged by other routines this will be the status code used. A standard list of HTTP status codes can be found [here](#).
