

## 3.x - GetFlushCacheFlag

Returns the enable authentication flag setting.

### Syntax

```
Response = HTTP_Services('GetFlushCacheFlag')
```

### Returns

Returns the flush cache flag setting. This is used by the [3.x - ClearSettings](#) service to determine if a Flush and GarbageCollect statement should be called in order for changes in web service procedures to always be available without having to restart the OEngineServer.

### Parameters

N/A

### Remarks

It pulls this from [SRP\\_HTTP\\_FRAMEWORK\\_SETUP](#) <7>.
