

## 3.x - GetNonAuthenticatedURLs

Returns the list of non-authenticated URLs.

### Syntax

```
Response = HTTP_Services('GetNonAuthenticatedURLs')
```

### Returns

Returns the list of non-authenticated URLs. This is used by the [3.x - URLRequiresAuthentication](#) service to determine if a specified URL requires authentication.

### Parameters

N/A

### Remarks

It pulls this from [SRP\\_HTTP\\_FRAMEWORK\\_SETUP](#) <8>.
