

# WebAccounts\_Services

Service module to handle Web Accounts interactions.

## Syntax

```
Response = WebAccounts_Services(@Service, @Params)
```

## Returns

The meaning of the response value depends on the service.

## Parameters

Parameter	Description
@Service	The name of the service being requested. <b>Required.</b>
@Params	Generic parameters. Refer to a specific service to determine the actual parameters used.

## Remarks

This module provides several useful services for high level interaction with database tables and rows.

## Services

Service	Description
<b>GetWebAccounts</b>	<p><b>Usage:</b> WebAccounts_Services('GetWebAccounts', AccountID, ReturnJSON)</p> <p><b>Comments:</b> Returns the database row from the WebAccounts table for the indicated Account ID. The default format is MultiValue.</p> <p><b>Returns:</b> See comments.</p>
<b>SetWebAccounts</b>	<p><b>Usage:</b> WebAccounts_Services('SetWebAccounts', AccountID, WebAccountsRow)</p> <p><b>Comments:</b> Updates the WebAccounts database row for the indicated Account ID.</p> <p><b>Returns:</b> N/A</p>
<b>ConvertMultiValueWebAccountsToJSON</b>	<p><b>Usage:</b> WebAccounts_Services('ConvertMultiValueWebAccountsToJSON', AccountID, mvWebAccounts, itemURL)</p> <p><b>Comments:</b> Converts a MultiValue formatted WebAccounts row into a serialized JSON object and returns the result. If the <i>mvWebAccounts</i> argument is empty, the service will attempt to get it from the WebAccounts table. If the itemURL argument is not empty, HAL+JSON properties will be added to the JSON object.</p> <p><b>Returns:</b> The indicated WebAccount in JSON format.</p>
<b>ConvertJSONWebAccountsToMultiValue</b>	<p><b>Usage:</b> WebAccounts_Services('ConvertJSONWebAccountsToMV', jsonWebAccounts)</p> <p><b>Comments:</b> Converts a serialized JSON WebAccounts object into a MultiValue formatted WebAccounts row and returns the result.</p> <p><b>Returns:</b> The indicated WebAccount in MultiValue format.</p>

## Params

The proper use of the generic arguments are defined in the definition of each service above.
