

SRP_HTTP_FRAMEWORK_RESOURCES

Stores a MultiValue array of resource definitions. These definitions are accessed using the Resources menu of the [SRP_HTTP_FRAMEWORK_SETUP](#) form:

Resource definition data is managed using the [HTTP_Resource_Manager_Services](#) module. Note: [SRP_HTTP_FRAMEWORK_RESOURCES](#) is the default configuration row for all applications. Each local application will copy this and maintain a local version using the format [SRP_HTTP_FRAMEWORK_RESOURCE S*<AppID>](#).
