

# SRP\_HTTP\_FRAMEWORK\_TEMPLATE\_API\_BODY

BASIC+ code to use when creating the main body of a new API module. Used by the *UpdateWebAPIs* service (member of the [HTTP\\_Services](#) module). Note: [SRP\\_HTTP\\_FRAMEWORK\\_TEMPLATE\\_API\\_BODY](#) is the default configuration row for all applications. Each local application will copy this and maintain a local version using the format [SRP\\_HTTP\\_FRAMEWORK\\_TEMPLATE\\_API\\_BODY\\*<AppID>](#).
