

SRP_Time AddMinutes

Adds minutes to a time.

```
Time = SRP_Time("AddMinutes", Time, Minutes)
```

Returns

A new time.

Parameters

Parameter	Description
Time	A time in OI internal format. (REQUIRED)
Minutes	The number of minutes to add. (REQUIRED)

Remarks

The "AddMinutes" service calculates a new time by adding the given number of minutes to an existing time. You can pass positive or negative whole numbers.

Examples

```
// Add 10 minutes the current time
NewTime = SRP_Time("AddMinutes", Time(), 10)

// Subtract 10 minutes from the current time
NewTime = SRP_Time("AddMinutes", Time(), -10)
```
