SRP_Time AddSeconds

Adds seconds to a time.

```
Time = SRP_Time("AddSeconds", Time, Seconds)
```

Returns

A new time.

Parameters

Parameter	Description
Time	A time in OI internal format. **(REQUIRED)**
Seconds	The number of seconds to add. **(REQUIRED)**

Remarks

The "AddSeconds" service calculates a new time by adding the given number of seconds to an existing time. You can pass positive or negative whole numbers only.

Examples

```
// Add 10 seconds the current time
NewTime = SRP_Time("AddSeconds", Time(), 10)

// Subtract 10 seconds from the current time
NewTime = SRP_Time("AddSeconds", Time(), -10)
```
