

# Properties

OLE control properties are the primary means of interacting with OLE controls. Properties, much like OI control properties, describe the persistent attributes of the control, that is, attributes having some meaningful value for the entire life of the control. Like OI control properties, OLE control properties are manipulated using the `Get_Property` and `Set_Property` routines. The following properties apply to the SRP Subclass Control:

Property	Description	Version Introduced
<a href="#">AutoFill</a>	Enables or disables autofill in combo boxes.	<a href="#">4.1.19</a>
