

ClickOption

Programmatically clicks the option/combo button of a cell.

Syntax

```
SendMessage(Ctrl, "OLE.ClickOption", Cell)
```

Parameters

Parameter	Description
Cell	Cell to be clicked, in the format Field:@FM:Record

Remarks

The ClickOption method provides a programmatic way of clicking a cell's option or combo dropdown button. The Cell parameter specifies a single cell to be clicked. You may pass an empty string to specify that the currently selected cell be clicked.

The cell will be put into edit mode, so the specified cell will become the selected cell.

Example

```
// Click cell (1, 1)
SendMessage(Ctrl, "OLE.EditCell", 1:@FM:1)

// Click the currently selected cell
SendMessage(Ctrl, "OLE.EditCell", "")
```
