

Properties

OLE control properties are the primary means of interacting with OLE controls. Properties, much like OI control properties, describe the persistent attributes of the control, that is, attributes having some meaningful value for the entire life of the control. Like OI control properties, OLE control properties are manipulated using the `Get_Property` and `Set_Property` routines. The following properties apply to the SRP HyperLink Control:

Property	Description	Version Introduced
Alignment	Alignment The caption's alignment within the hyperlink's bounds.	
Background	The control's background color.	
Border	The control's border style.	3.1.0
BorderColors	Customizes the colors of an SRP ActiveX Control's border.	3.1.0
Caption	The static hyperlink text.	
ExecuteCmd	The command to be executed when the hyperlink is clicked.	
Font	The font used to render the hyperlink caption when the mouse is not over the text.	
FontColor	The color used to render the hyperlink caption when the mouse is not over the text.	
HyperFont	The font used to render the hyperlink caption when the mouse is over the text.	
HyperFontColor	The color used to render the hyperlink caption when the mouse is over the text.	
ProgID	The control's ProgID/Class Name.	
Version	The control's version info.
