# Version

The control's version info.

## Usage

```
Set_Property(OLECtrlEntID, "OLE.Version", Array)
```

## Values

Array has the following structure:

Pos	Name	Туре	Description
<1>	Version Number	Decimal	The control's version number
<2>	Last Build	Text	The data and time of the control's last build

### Remarks

This read only property exists in all SRP OLE controls to provide an easy way to determine which version of the control is in use.

### Example

```
// Get the control's version
Version = Get_Property(@Window:".OLE_CONTROL", "OLE.Version")
```
