HotColor

The splitter's color when the mouse hovers over it.

(i) Added in version 4.1.15

Usage

Set_Property(OLECtrlEntID, "OLE.HotColor", ColorFill)

Values

ColorFill can be any Color Fill value.

Default: None

Remarks

The HotColor property establishes the color for the control when the mouse hovers over it. Set this "None", which is the default, if you don't want hover effects.
