

OnEditFieldLostFocus

Fired when a user exits an edit field control.

Parameters

Parameter	Description
Control	The key of the edit field control
CurrentValue	The edit field control's current text

Remarks

The OnEditFieldLostFocus event fires when the user leaves an edit field control. The first parameter is the unique ID of the edit field control, and the second parameter contains the control's current text.

Example

```
Begin Case

    // When the user leaves our search control, do a search
    Case Event EQ "OnEditFieldLostFocus"
        ControlKey = Param1
        SearchString = Param2
        GoSub DoSearch

End Case
```
