

ItemSwatchSize

An item's swatch size.

Usage

```
Set_Property(OLECtrlEntID, "OLE.ItemSwatchSize[key]", Array)
```

Values

Array has the following structure:

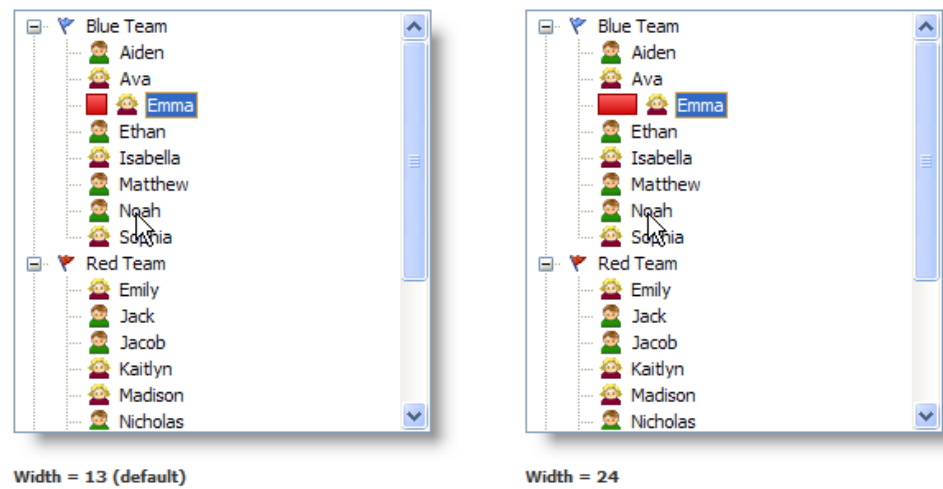

Pos	Name	Type	Description	Default
<1>	Width	Integer	The width of the swatch	13
<2>	Height	Integer	The height of the swatch	13

Indices

Index	Description
key	An item's unique key

Remarks

The ItemSwatchSize property establishes item's swatch size. A swatch is a patch of color that can be used to associate an item to a color. By default, swatches are 13 pixels wide and tall. Use this property to alter either the width or height.

TIP: Use the [DefSwatchSize](#) property to set the default swatch size for new items.

Example

```
// Increase the width of all item's swatches to 16 pixels
Set_Property(@Window:".OLE_TREE", "OLE.ItemSwatchSize[All]", 16)

// Set item one's swatch to 8x8 pixels
Set_Property(@Window:".OLE_TREE", "OLE.ItemSwatchSize[Item1]", 8:@FM:8)
```
