

LinesEnabled

Enables hierarchy lines.

Usage

```
Set_Property(OLECtrlEntID, "OLE.LinesEnabled", Boolean)
```

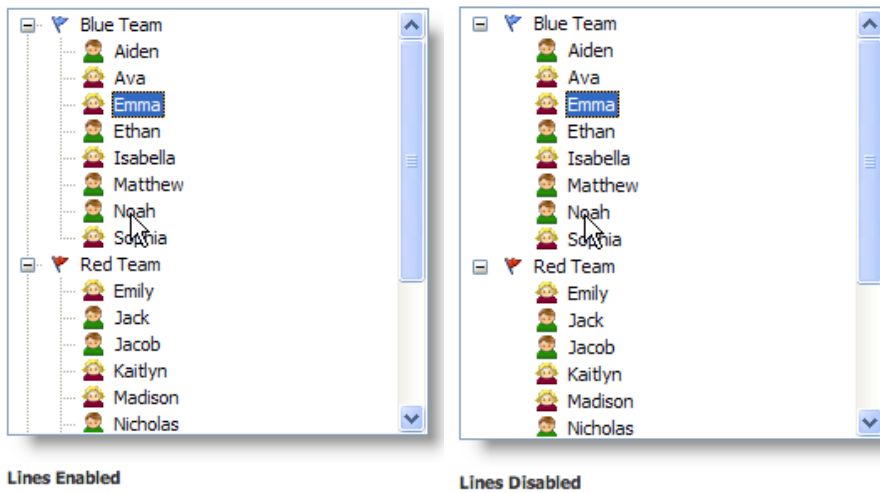

Values

[True | False]

Default: True

Remarks

The LinesEnabled property enables or disables the dotted lines used to show the parent/child relationship. These lines are visible by default, but you can remove them by setting this property to 0. In some cases, doing so can improve the readability of your tree control.

You can customize the color of the lines using the [Colors](#) property.

Example

```
// Enable hierachy lines
Set_Property(@Window:".OLE_TREE", "OLE.LinesEnabled", 1)
```
