

ComboText

A given combo box control's current value.

Usage

```
Set_Property(OLECtrlEntID, "OLE.ComboText[key]", Text)
```

Values

Text can contain anything.

Default: ""

Indices

Index	Description
key	The target combo box's unique control key

Remarks

The ComboText property gets or sets the current text of a given combo box control. When you defined the combo box during the [Init](#) method, you gave it a unique key. You must pass that key in order to get or set its text.

Example

```
// Set my Font combo box to a default font
Set_Property(@Window:".OLE_RIBBON", "OLE.ComboText[COB_FONTFACE]", "Tahoma")
```
