

DSOPREV

Description

Go to the previous (positional) record in the DataSet.

Syntax

bforward = **DSOPREV** (*ctrlentID*, *ctrlclassID*, *DSOID*, *circular*)

Parameters

DSOPREV accepts arguments for the following parameters.

Parameter	Description
<i>CtrlentID</i>	Has the format <i>WindowName.ControlName</i> , where <i>WindowName</i> is the identifier of the window that contains the affected control, and <i>ControlName</i> is the identifier of the control. Notice that a period separates the two values.
<i>ctrlclassID</i>	The type of control that recognizes the event. The window control type is the only valid entry.
<i>DSOID</i>	The name of the DataSet, or the ordinal number of the DataSet (its position in the list of DataSets that appears in the Form Designer's <i>Edit Selection Criteria</i> dialog box)
<i>Circular</i>	Boolean flag that when set to 0 stops at the first record, when 1 backs up to the last record after the first.

Returns

True or false. If false, then program execution returns to the calling procedure. If true, then event processing goes to the next level.
