

# PAGE

## Description

Executes a specified page action.

## Syntax

*bforward* = **PAGE** (*ctrlentID*, *ctrlclassID*, *pageaction*)

## Parameters

PAGE accepts arguments for the following parameters.

Parameter	Description														
<i>ctrlentID</i>	Has the format <i>WindowName.ControlName</i> , where <i>WindowName</i> is the identifier of the window that contains the affected control, and <i>ControlName</i> is the identifier of the control. Notice that a period separates the two values.														
<i>ctrlclassID</i>	The type of control that recognizes the event. The window control type is the only valid entry.														
<i>pageaction</i>	pageaction may be one of the following: <table><tr><th>Value</th><th>Description</th></tr><tr><td>&lt;number&gt;</td><td>Go to the specified page. If &lt;0, then 1. If &gt; max page, then maximum (last) page.</td></tr><tr><td>'+'</td><td>Go to the next page, no wraparound.</td></tr><tr><td>'++'</td><td>Go to the next page, wraparound.</td></tr><tr><td>'.'</td><td>Go to the previous page, no wrap.</td></tr><tr><td>'--'</td><td>Go to the previous page, wraparound.</td></tr><tr><td>'L'</td><td>Go to the last page. Passing a large number will do the same.</td></tr></table>	Value	Description	<number>	Go to the specified page. If <0, then 1. If > max page, then maximum (last) page.	'+'	Go to the next page, no wraparound.	'++'	Go to the next page, wraparound.	'.'	Go to the previous page, no wrap.	'--'	Go to the previous page, wraparound.	'L'	Go to the last page. Passing a large number will do the same.
Value	Description														
<number>	Go to the specified page. If <0, then 1. If > max page, then maximum (last) page.														
'+'	Go to the next page, no wraparound.														
'++'	Go to the next page, wraparound.														
'.'	Go to the previous page, no wrap.														
'--'	Go to the previous page, wraparound.														
'L'	Go to the last page. Passing a large number will do the same.														

## Returns

True or false. If false, the program execution returns to the calling procedure. If true, the event processing goes to the next level.
