POSCHANGED

Description

Occurs when the position of the edit table cell with focus changes.

Syntax

bforward = **POSCHANGED** (ctrlentID, ctrlclassID, nextcolumn, nextrow)

Parameters

POSCHANGED accepts arguments for the following parameters.

Parameter	Description
ctrlentID	Has the format 'WindowName.ControlName, where WindowName is the identifier of the window that contains the affected control, and ControlName is the identifier of the control. Notice that a period separates the two values.
ctrlclassID	The type of control that recognizes the event. The edit table control is the only valid entry.
nextcolumn	Current column.
nextrow	Current row.

Returns

True or false. If false, then program execution returns to the calling procedure. If true, the event processing goes to the next level.

Note: When the edit table initially gets focus, the POSCHANGED event is not generated. Use a QuickEvent on the GOTFOCUS event to send POSCHANGED to the edit table if desired.
