

TIMER

Description

Occurs when the amount of time specified by the TIMER property has passed.

Syntax

bforward = **TIMER** (*ctrlentID*, *ctrlclassID*)

Parameters

TIMER accepts arguments for the following parameters:

Parameter	Description
<i>ctrlentID</i>	Has the format <i>WindowName.ControlName</i> , where <i>WindowName</i> is the identifier of the window that contains the control effected, and <i>ControlName</i> is the identifier of the control. Notice that a period separates the two values.
<i>ctrlclassID</i>	The type of control that recognizes the event. The window control type is the only valid entry.

Returns

True or false. If false, the program execution returns to the calling procedure. If true, the event processing goes to the next level.

Remarks

To stop the generation of TIMER events, set the TIMER property to 0 (zero) for the window specified by the *ctrlentID* parameter.
