Footing

Description

The Footing keyword will cause Run_Report to produce a running page footing (text at the bottom of each page). The footing can contain text, page numbers, dates, and other information.

Syntax

Footing *"text ['options'[,format]]"*

Remarks

The footing clause consists of the keyword Footing followed by the footing specifications in double quotes.

Note: You must use double quotes.

The format of the options for Footing are exactly like those of the keyword Heading. For example:

```
Footing "Report produced on 'D'"
```

For details about the options available in Footing, please refer to the Heading keyword.

Examples

```
* Create a footer

Declare Subroutine Run_Report

Stmt = 'LIST CUSTOMERS CUSTOMER_NAME CITY '
stmt:= 'FOOTING "This is the Footer" '
Run_report("",stmt)
```
